

the RESTEK ADVANTAGE

IN THIS ISSUE

Professor Walter Jennings
Preventive Maintenance for GC 2

Environmental **2006.02**
Excellent Responses in GC/MS
Analysis of Semivolatiles 6
Analysis of Semivolatile Organics 8

Pharmaceutical
Optimizing Difficult
Separations of Steroids 4
8-Minute GC Analysis
of Residual Solvents 10
Simple, Optimized HPLC
Analysis of Catecholamines 12

Foods, Flavors & Fragrances
80% Faster GC/MS Analysis
of Essential Oils 13

Analytical Reference Materials
SOM01.1 14

Bioanalytical
Improve Characterization of
Complex Protein Digests 16

HPLC Accessories
Sidewinder™ Column Heaters
and Heater/Cooler 17

Chemical/Petrochemical
Parker ChromGas® Hydrogen Generators 18

Clinical/Forensics
GC Inlet Liner Deactivations
for Basic Drug Analysis 20

GC Accessories
Inlet Seals for Agilent Instruments 3
Instrument Innovations 22

Erratum
Exempted drugs of abuse reference materials alprazolam (cat.# 34042), chlordiazepoxide HCl (cat.# 34044) and levorphanol (cat.# 34003) are at a concentration of 1mg/mL, not as listed in Advantage 2006v1.

Daily drawing winners at our PittCon® booth
Monday: Dr. S. Todd Swanson, University of Nebraska, Lincoln, NE
Tuesday: Dr. Jeffery Loo, General Motors, Milford, MI
Wednesday: Dr. Steven DuBose, Alcon Research, Fort Worth, TX
Thursday: Dr. Shawn Shanmugan, US Smokeless Tobacco, Nashville, TN
Congratulations, gentlemen, and thank you to everyone who visited our booth!

Restek Trademarks
Allure, Crossbond, Cyclosplitter, EZ Twist Top, MegaMix, pHidelity, Press-Tight, Rtx, Rxi, Sidewinder, Siltek, Stabilwax, Trident, Turning Visions into Reality, Uniliner, Restek logo.

Other Trademarks
Aroclor (Monsanto Co.), ChromGas (Parker Hannifin, Inc.), Freon, Vespel (E.I. du Pont de Nemours & Co., Inc.), Kromasil (Eka Chemicals AB), MicroPulse (Scientific Systems, Inc.), PEEK (Victrex plc), Pittcon (The Pittsburgh Conference on Analytical Chemistry and Applied Spectroscopy).

Allure Biphenyl™ HPLC Columns

Exclusive to Restek!

- Unique stationary phase promotes π - π interactions with aromatic and unsaturated compounds.
- Enhanced selectivity for steroids, contraceptive hormones, tetracyclines, explosives.
- Improved retention, relative to traditional phenyl phases, for unsaturated or saturated compounds.

See **page 4**.
