The speed at which one can create an ebook product is excellent. I am actually getting an entire project done in less than 10 minutes. I am, like most people a quick thinker and it is great to have a product that doesn't slow my thought process down as I am working! Awesome product!

Designrr is easy to use, intuitive and delivers a high end product for a VERY reasonable investment. I highly recommend it - and do so at every opportunity!

This is probably one of the very best services that I have ever purchased online. I cautiously started with the level which allows for ePDFs; and in less than two weeks, I am already wanting to upgrade to e-books. I have already gotten value for money; it is worth the while. This might be the inspiration that I needed that will turn me into a truly professional book author! I have loads of content that now I have a way of presenting more effectively and efficiently. And Designrr is so easy to use.
