

Rxi[®] Columns

Exceptionally Inert Capillary Columns

Unsurpassed inertness

An Rxi[®] column's inertness allows analysis of active compounds at levels not attainable with other manufacturers' columns. Basic and acidic compounds can be analyzed on the same column, often under the same conditions.

Ultra-low bleed

Save time and money through faster baseline stabilization. With the lowest column bleed in the industry, Rxi[®] columns improve detection for trace level GC/MS analysis. Ultra-low bleed also reduces conditioning time after instrument maintenance.

Guaranteed reproducibility

Consistency is everything. With Rxi[®] column technology, we guarantee it: every new column will perform exactly as the column it replaces.

Unmatched performance

Every Rxi[®] column is held to stringent performance specifications for coating efficiency, selectivity, film thickness, inertness, and bleed. This guarantees you the most reliable columns available anywhere.
