Meet The Ryoko Pro

Avoid expensive roaming costs and **stop struggling with slow and unsafe public Wi-Fi!** With the Ryoko Pro, you can set up your own private internet connection that's both safe and fast. Never worry again while using online banking apps on the go. The Ryoko Pro features the latest internet security applications. You can rely on the

Who can use the Ryoko Pro?

The Ryoko Pro brings the internet **to the most remote places**. It's for people who want to get work done when traveling for business or for families that want a stable internet connection during a vacation. Families can watch their favorite HD movies and TV series without annoying buffering issues.

With the Ryoko Pro, you can share your secure internet access with your family and friends. The small but compact wi-fi router lets you connect **up to 10 devices**, including your tablet, smartphone, gaming console, laptop, and many more.

How to use the Ryoko Pro?

The Ryoko Pro is very straightforward to use. **Set it up in seconds**. Just power on the device, set up a password, and connect your device. That's it!

It works completely wirelessly. Inside is a powerful rechargeable battery that lasts **up to 8 hours**, providing you with a fast internet connection the whole day through.

The Risks of Public Wi-Fi

Every year, hackers, using public Wi-Fi and fake Wi-Fi hotspots, steal over **1.2 Billion dollars, as well as gigabytes of personal data.** Financial fraud specialists agrees that 67% of people have used insecure public Wi-Fi in the last 6 months putting themselves at risk of loosing their personal data, pictures, documents and money. Can you REALLY take the risk? Ryoko Pro provides a closed, individual network. Think of it as **your own personal fortress with you as the gatekeeper. No more risk of getting your money and data stolen!**

"This is the ultimate Wi-Fi solution!"

"This is an impressive device. Its compact design makes it incredibly easy to carry around, and it delivers consistent and reliable wireless

Tyler ✔ Verified Buyer

★★★★★

Purchased this device for a trip out of the country. I knew the internet on our phones would be outrageously expensive over there. To save money, I bought this little thing. First of all, it's super easy to set up and use. We used it to get online to find lodging, access GPS maps, use Skype video calls, and watch movies without buffering! PERFECT!! Would highly recommend!!!

Jennifer ✔ Verified Buyer

★★★★★

It is a very useful gadget if you need internet access while you travel and if you are going to be mostly in areas with no public wi-fi, as in the hotel, or, if you need to access sensitive data, like your bank account and you don't want to use public Wi-Fi for that. It works very well, everywhere, and is really fast. I've had no issues with it.

Andrew ✔ Verified Buyer

★★★★★

Put simply, this is an amazing device that is now essential for me. With this router, you have reasonably priced internet automatically connected to multiple devices as soon as you land in a new country. This device provides cheap internet both at home and abroad, much cheaper than using 4G on your smartphone. If you travel a lot like me, this is worth getting!

Benjamin ✓ Verified Buyer

We purchased this as a backup in case our router in our small office failed for any reason and also for vacations. We like to hike, and sometimes our trips take us to remote places where it is difficult, if not impossible, to find Wi-Fi. I used it a couple times in the office and on weekend trips, and it works wonderfully. Highly recommend!

Emily ✓ Verified Buyer

I did a lot of research into mobile internet devices, and this is pretty much the only option if you want fast data speeds anywhere. The fact that you can connect 10 devices simultaneously makes this device unbeatable for its price. Will be using it soon on a trip, but I did a speed test while connected to it, and it was very fast. 5/5.

Paul ✓ Verified Buyer

Easy setup. I have no issue with connectivity so far, even in really remote areas. Speed is as good as the local Wi-Fi, I would say. It is so much cheaper than using your smartphone as a hotspot. It has a great feature for limiting max data usage. Good compact size and the battery holds up nicely as well.

Adam ✓ Verified Buyer

Worked exactly as claimed. Easy to link different devices to it. I used it with my friends and we all had a strong signal. Able to make calls and surf the internet at high speed. Battery is large and keeps my phone and laptop connected for full-day use.

Nathalie  Verified Buyer

This is my new travel buddy! The device is the size of an iPhone, though a bit thicker, it can still fit in my pocket. Connecting my phone and laptop is super easy and fast. I will always use this during my travels.

To which devices can the Ryoko Pro be connected?

Is the SIM card included? How much data do I get with it and what are the options to top up?

Can my kids / parents use it? I ney struggle with technology.
