

DESIGN

CENTER

“It would have taken me two to three times as long and two to three times as much money without Value Plastics. This is who you want to work with. They have become part of our team.”

Fitting The World's Most Fluid Designs

How it works:

- 1 Define your product requirements:**
Describe your application and requirements or provide us with a drawing or simple sketch. From here we can determine what details are needed and can help define the most ideal and cost-effective connector concept for your application.
- 2 Call the Design Center to explore your connector options:**
There may be a suitable off the shelf solution or perhaps we can adapt an existing connector to your application. Often the modification of an existing mold can be significantly faster and less expensive.
- 3 Collaborate:**
Working with your requirements, we can help walk you through the most cost effective solutions to achieve your desired performance. That may mean simply taking 2 or 3 connectors and identifying a low-cost means to roll them into a single connector.
- 4 Go-to-market:**
As we arrive at a solution together, we closely involve your team in the design and development process to ensure that as we approach production you have everything you need for qualification to get you to market both quickly and safely. The rest is up to you!
