IT'S A LOCK WITH VALUE PLASTICS!

Our MLRL and MSL Series of fittings can be used both as a slip luer or as a locking luer with the addition of our FSLLR luer lock ring, which allows color coding without flow path contact. Our MSL/FSLLR combination results in a stationary lock ring. Use a combination of MLRL and FSLLR to create a color coded rotating lock ring.

The MLRL allows FSLLR/lock ring rotation

The MSL has flanges which lock into the FSLLR, preventing rotation

Used together, you can create a color coded male luer with lock ring

MALE LUER:
Slip, or for use with Stationary Lock Ring
